

Workshop on “3D Printing technology” organized by GUITAR.

- Event Schedule: 11th March 2020
- Key deliverables:
 1. Application of 3D printer Technology
 2. Troubleshooting methods while 3D printing objects
 3. Post processing of 3D printed objects
- Takeaways:
 1. Students can make 3D projects which can be helpful for their innovative student projects
 2. Students will be able to participate in 3D printing competition.
- Learning:
 1. Students learned about the use of 3D printers to develop 3D objects
 2. Students learned about problem solving and skills to develop objects in 3D printers
- Feedback of student: Excellent workshop which all the students enjoyed and learned actively
- Speakers and Guests: Dr. Kaushal Bhavsar, Assistant prof. at LDRP-ITR, Gandhi Nagar, Gujarat and Founder of “Future Technologie”- Bridging Skill to Tech.
