

Name: Mr. Anupam Jalote

Designation: CEO

Organization: iCEM - International Centre for
Excellence in Mining

Total Experience: 30+ Years

Location: Ahmedabad

Education:

1. MBA – Strategy

GISMA, The Hannover Campus, Purdue University

2. MBA – Operations Research and Marketing

3. Bachelor of Arts

Brief:

Shri Anupam Jalote is a pioneering force in India's electric vehicle (EV) and cleantech sectors, reimagining EVs as intelligent systems beyond traditional mechanical devices. With a bold vision to make India a global hub for small electric vehicles, he is transforming the sector through innovation, open standards, and strategic ecosystem development.

A trailblazer in interoperability, he introduced an open-source standard that enabled an Indian firm to develop a rare-earth-element-free motor through international collaboration—positioning India at the forefront of next-generation EV technology. He also founded EVangelise, the country's largest EV innovation challenge, to support startups across the EV value chain.

With over 15 years of experience in renewables and cleantech, Shri Jalote is committed to reducing India's dependence on imported components. He strongly advocates for localized manufacturing, including generic parts and indigenous power electronics, to build resilient and scalable supply chains.

His philosophy is rooted in the concept of a “Just Transition”—ensuring that the shift to cleaner fuels is equitable and feasible for developing nations. As a strong proponent of Underground Coal and Lignite Gasification (UCG), he promotes cleaner energy extraction methods that avoid mining and reduce environmental impact by producing synthesis gas (SynGas) underground.

In addition, Shri Jalote is leading efforts to build India's Rare Earth Elements (REE) ecosystem—from mining to permanent magnet

production—through global collaborations. This strategically important initiative aims to enhance India's technological sovereignty and reduce reliance on foreign supply chains.

Beyond his entrepreneurial work, he serves on various scientific and technological advisory boards, reflecting his deep commitment to innovation and national progress. With strategic foresight and the ability to scale technologies from concept to market, Shri Anupam Jalote stands as a key architect of India's sustainable, self-reliant future.

Experiences:

1. Chief Executive Officer, iCEM - International Centre for Excellence in Mining : Apr 2023 - Present
2. Strategic Advisor, Innovation Strategist , Climate Risk Mitigation , Electric Vehicles : self employed
3. CEO, iCreate - International Centre for Entrepreneurship and Technology: Jun 2016 - Oct 2022
4. Director - CEO , GreenOil Energy Sciences (Pvt) Ltd : Jun 2008 - May 2016
